

Software for ZGM 1110 / 1120

- ⇒ The free versatile measuring and data analysis software for glossmeter types ZGM 1110 and ZGM 1120
- ⇒ The GlossTools software opens the gateway to a more efficient and productive quality control : Measuring results are transmitted directly to the PC/laptop and can be processed immediately
- ⇒ Menu-guided in several languages : German, English, French, Italian, Swedish and Spanish, further languages can be included on request
- ⇒ Several geometries can be displayed simultaneously
- ⇒ Single, multiple and continuous measurements (min. interval of 1.5s) can be taken
- ⇒ On-going updated statistics of the gloss values (average, standard deviation, max., min.)
- ⇒ Definition and storage of thousands of limit values and reference values for gloss range measurements and indication of pass/fail information

Features

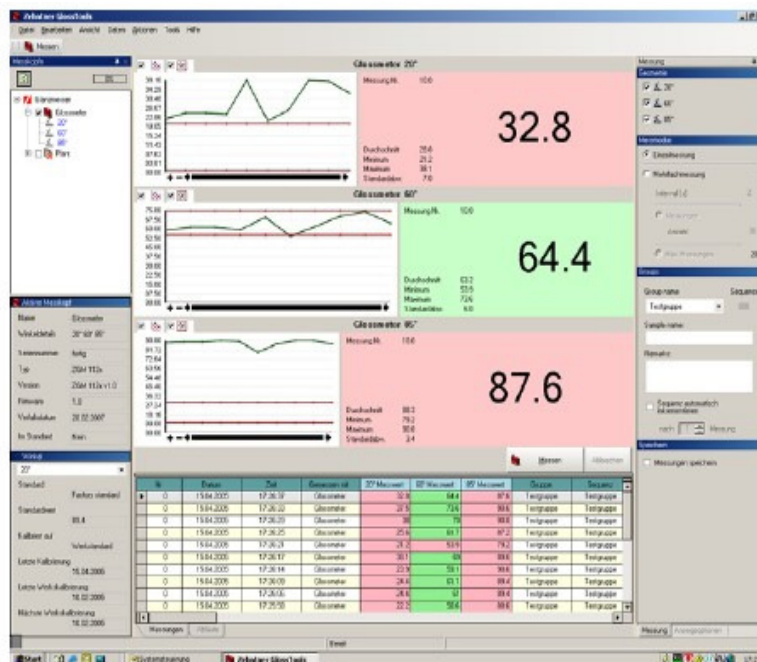

- Direct operation of the glossmeter types ZGM 1110 and ZGM 1120 on the PC/laptop enables an easy transfer of the measuring data to in-house databases or processing in Microsoft Excel
- Multi-language menu-guidance
- Automatic prompt for calibration if necessary
- Automatic fast calibration of all supported geometries on the device's working standard
- Extended calibration for the geometries of your choice or calibration on a 2nd standard
- Automatic recognition of standard
- Information on the active measuring head and geometry is available anytime
- Unique status manager which draws the user's attention to several events
- Several geometries can be displayed simultaneously
- Single, multiple and continuous measurements (min. interval of 1.5s) can be taken
- In the sequence mode you can define the amount of measurements per sample
- On-going updated statistics of the gloss values (average, standard deviation, max, min)
- Definition and storage of thousands of limit values and reference values for gloss range measurements and indication of pass/fail information
- A complete test report in pdf-format can be created
- The GlossTools software is able to store an endless number of measurements

Standard delivery

- GlossTools is included in the delivery of ZGM 1110 Glossmeter and ZGM 1120 Glossmeter, free of charge

Technical specification

Glossmeters	ZGM 1110 and ZGM 1120
Operating system	Windows [®] 8, Windows [®] 7, Windows Vista [®] , Windows [®] XP SP2 or later
System requirement Memory (RAM)	min. 128 MB, 256 MB recommended
Hard disc space	min. 60 MB
